Glossary of Terms

RCR: Rock Chalk Rendezvous

User Calendar: The complete availability schedule for a single user.

Event Calendar: A calendar that includes the schedules for each user that has been added to the event.

Client side: Functionality or state that exists in or is handled by the end user's device when running the client application.

Server side: Functionality and state handled by the continuously running process on a dedicated server that manages communication between client applications and that users do not have direct access to.
