1. Purpose

This user manual is an easy-to-understand guide on how to use our software.

2. Introduction

This section should provide a brief overview of the software, including its purpose, features, and how to install and run it.

3. Getting Started

This section should provide a step-by-step guide on how to use the software to evaluate arithmetic expressions. It should include instructions on how to enter expressions, how to use the various operators and functions, and how to interpret the results.

4. Advanced features

This section should describe any advanced features of the software, such as the ability to save and load expressions, or to define custom variables and functions.

5. Troubleshooting

This section should provide a list of common problems, if any, that users may encounter, and how to solve them.

6. Examples

This section should provide examples of how to use the software to evaluate different types of arithmetic expressions. (include screenshots)

7. Glossary of terms

This section should define any technical terms that are used in the manual.

8. FAQ

Q: Is this just a better version of the When2Meet scheduling website?

A: Yes, it is!

Q: Can I access this from my computer
